

## **Dome Milano Interior for Milan Design Week**

A boiserie able to redesign an entire space, reinventing and punctuating it through the use of retro yet modern textiles that play with our perception of time. Moths, organic motifs and geometric patterns: the dynamism created by these elements encloses the design display set up by Dome Milano Interior. The furniture is surrounded by daring colours, radiating new design ideas and perspectives.

Home furnishing designed by Arflex play a central part in the showroom's exploration of time and space. Principal features are modular elements alterable in shape and dimension, new - and already iconic - armchairs, and classic pieces that still emanate modernity. Spotlight on Strips, the illustrious sofa designed by Cini Boeri and celebrating its 50-year anniversary, that exemplifies the notion that good design doesn't age.

To create a sense of continuity the living area is transformed into the kitchen: no longer two separate areas, the two rooms now feature as a single space built around its occupants. To accomplish this objective it was crucial to start from scratch and completely rewrite the concept of kitchen space: Dome realizes this vision with Arclinea, entering for the first time the world of kitchen design and achieving outstanding results. The use of avant garde materials and of clean and graceful lines are the uniting features of the entire project. The finishes, combinations and details give harmony to the display, making it a stunning unicum of design, in which every element is essential.
