SALONE DEL MOBILE.MILANO 2018 | PREVIEW

MILAN, 17-22 APRIL 2018

Teorema design Ron Gilad

Teorema, presented at last year's Salone del Mobile.Milano and winner of the Wallpaper design Award 2018 in the Best Twist Action category, is evolving towards new forms of home furnishings.

Ron Gilad, true to the original design that sees Teorema as a collection based on the geometric form of a void, turns the chest of drawers featuring elements off-set with respect to the central axis into a storage unit where containment and open glass parts are superimposed to create a single solid with a densely faceted surface

The drawers can be placed in axis or unusually at 45° compared to the rest of the unit.

The finish, either of canaletto walnut or eucalyptus, is a perfect blend between the micrometrical precision of the mechanical machining and the craftsmanship involved in folding and gluing the structural elements.
